

Technical Specifications

Arena Size

Minimum 30m x 30m, maximum 60m x 60m.

For safety reasons please ensure the arena is as level and flat as possible, and suitably roped. With regards meet and greet purposes following the display an area of approximately 3m² would be ideal, preferably just outside the arena, although this can easily be back at the horsebox/stable tent.

Over Night Parking Area

We are a self contained unit so will not require any extra stabling/marquee. Area required for horsebox/stable tent is 15m x 15m, and must be in a secure, grassed area. Please consider where you site us, as we will need to move the horses from here into both the warm up area and arena, and back again. If required, meet and greet following the display(s) can be incorporated into this area.

Warm Up

It is vital that we have an area in which we can warm the horses up prior to the display. Ideally about 20m by 20m, but any small corner/edge of a field will suffice.

Performance Times

Please ensure a minimum of two hours between performance times. Please let us know as soon as possible if the arena is running ahead or behind schedule.

Water and Electricity

Please provide access to water. Electricity is not necessary, but is always appreciated!

PA Requirements

It is vital that we have two wireless hand held microphones. We also require a CD sound system with competent operator. For smaller events we can supply our own PA system for a £40 surcharge.

Please ensure you are able to fulfil these requirements. Failure to do so may result in us being unable to provide you with the full display. In this case the full fee will still be due.
